Pick Heaters, Inc. to Exhibit at the 2023 Process Expo

West Bend, WI – June 20, 2023 – Pick Heaters, Inc., a leader in the process heating industry for over 75 years, will be exhibiting at the 2023 Process Expo, the global food equipment and technology show. The expo will take place from October 23-25, 2023, at McCormick Place in Chicago, Illinois.

Pick Heaters will showcase its innovative direct steam injection liquid heaters, which provide solutions to an array of special applications in the food processing industry. Pick Heaters are used for process water heating, plant sanitation, and CIP, delivering instant, unlimited hot water at a precise temperature.

Pick Heaters will also display its sanitary direct steam injection jet cookers, which are designed for in-line product cooking and heating CIP solution. Pick Heaters are ideal for products such as soups, sauces, gravies, starches, dairy products and more. The jet cookers offer exceptional temperature control, fast heat-up and cook times, and low maintenance costs.

“We are excited to participate in the 2023 Process Expo and to connect with our customers and prospects in the food industry,” said Mark Brueggemann, National Sales Manager of Pick Heaters. “We look forward to demonstrating how our direct steam injection heaters can help them improve their processes, reduce their energy costs and enhance their product quality.”

Pick Heaters invites attendees to visit booth #2504 at the expo to discuss your application. For more information about Pick Heaters, visit www.pickheaters.com or call (262) 338-1191.
