

AWI Manufacturing Brings 55 Years of Sanitary Stainless Expertise to EATS 2025

Winsted, MN (10-7-25) – AWI Manufacturing, a leading U.S. provider of stainless steel equipment for the food and beverage industry, will showcase its complete line of sanitary stainless steel solutions at **EATS 2025**, taking place **October 28–30 in Chicago, Illinois**.

AWI will feature its **stainless steel sanitary drain systems, electrical enclosures, tanks, and hex hangers**, each engineered for exceptional performance, durability, and sanitation. With more than 55 years of experience, AWI continues to provide hygienic, U.S.-made equipment that meets the rigorous demands of food, dairy, and pet food production while supporting plant safety and regulatory compliance.

At EATS, AWI will highlight:

- **Sanitary Drain Systems** – Trench drains, floor sinks, and point drains engineered for aggressive wash-downs, heavy traffic loads, and caustic cleaning agents. Fully welded construction and corrosion-resistant materials minimize harborage points, simplifying sanitation.
- **Stainless Steel Electrical Enclosures** – Designed to protect critical systems in wet, high-pressure environments. AWI enclosures feature hygienic construction, durable gasketing, and polished finishes that support both plant safety and regulatory compliance.
- **Tanks & Stainless Steel Hangers** – Custom-fabricated solutions for mounting and storage, leveraging AWI's precision craftsmanship to ensure strength, reliability, and long service life.

“All of our products are fabricated in the U.S. to support food safety, operational efficiency, and long-term reliability,” said **Brent Johnson, Vice President of AWI Manufacturing**. “EATS 2025 is a great opportunity to connect with processors and show how AWI equipment helps improve performance and streamline cleaning.”

AWI invites attendees to visit their booth #3004 at EATS 2025 to explore equipment solutions that go beyond compliance to deliver real value in sanitary design and plant efficiency.

About AWI Manufacturing

AWI Manufacturing, based in Winsted, Minnesota, has been serving the food and beverage industry for over five decades with stainless steel sanitary solutions. The company specializes in **drains, enclosures, tanks, and custom metal fabrication** built to the highest standards of sanitation and durability.
