

FOR IMMEDIATE RELEASE

What: Phenix Corporation's groundbreaking for new corporate headquarters

When: Thursday June 26, 2025 at 10:00 CST

Where: 11600 Nobles Chapel Road, Elberfeld, IN 47613

Phenix Corporation, a leading supplier of packaging and packaging equipment, is proud to announce the official groundbreaking ceremony for its new corporate headquarters and manufacturing facility. The ceremony will be held at the Phenix campus in Elberfeld, Indiana, at 10:00 AM on Wednesday, June 26th.

Phenix Corporation is 100% employee-owned and has experienced phenomenal growth over the past three years, tripling in size and expanding its workforce to over 40 team members, including warehouse staff, customer service professionals, and field engineers. With three buildings in Indiana and one in Florida, Phenix will be well-positioned to continue its national support of the packaging industry.

At the core of this growth are Phenix's unwavering guiding principles—Fanatical About Response, Do the Right Thing, and We Own It. These three tenets are not slogans; they are the foundation of how Phenix operates, makes decisions, and supports its customers. They define the company culture and fuel a relentless commitment to responsiveness, integrity, and accountability.

The groundbreaking marks a major milestone in the company's strategic growth, as construction begins on Phenix's third facility in Indiana. The 39,000-square-foot facility will serve as the new headquarters for Phenix's operations and will feature a manufacturing floor, enhancing customer service. With this expansion, Phenix expects to create 10-15 new jobs in Warrick County, including positions in quality assurance, operations, and material handling.

"Breaking ground on this new facility is more than an expansion—it's a statement of who we are and what we believe in," said Michael Denton, Director of Marketing at Phenix Corporation. "Our tenets drive every interaction, every project, and every customer relationship. This building will serve as a platform for our continued growth and a physical reflection of the values that define Phenix."
